PHNOM PENH INTERNATIONAL AIRPORT EXPANSION

Back to list view

Application range	Type
Airport	Reference, Showcase

The airport expansion added 1600 square meter which enabled the airport to increase the quanity of check in counters, immigration counters and X-ray machines for hand carry luggage. Besides that, this project also added a food court, pharmacy, expanded duty free area, business lounge area and additional two boarding gates.

With the new facilities Phnom Penh airport targeting new destinations to India, Indonesia and Japan, we are proud to say this is now the first airport in South East Asia which use TROX new jet nozzle model, TJN.

The contractor, Lotus Green Team agreed with the new features, swirl unit and preset swirl angle compare traditional jet nozzle. Besides TJN, TROX Malaysia also supplied grilles and diffusers, louvers, dampers and fire dampers to this project.
