

FRESH AIR FOR LEARNERS

PRESENCE TEACHING – SUSTAINABLY SAFE WITH TROX VENTILATION TECHNOLOGY

The school lessons in the coronavirus pandemic have shown how quickly the seemingly self-evident can become a daily challenge – for pupils, **teachers** and **parents** equally.

Now it is important to learn from these experiences and make our schools **safer for the future**.

This requires well thought-out technical solutions from **experienced manufacturers**.

As Germany's No. 1 provider of ventilation technology, we can offer you these solutions. With air purifiers and decentralised fresh air systems that ensure a good and safe learning climate in every room – without extensive structural interventions.

TROX AIR PURIFIERS

THE FAST STAND-ALONE SOLUTION TO AEROSOLS CONTAMINATED BY VIRUSES

With the TROX AIR PURIFIER, you reduce the risk of transmission of viruses in insufficiently ventilated rooms to a minimum – without any complex installations. Simply set it up and switch it on.

SAFE AIR DISTRIBUTION

In the TROX AIR PURIFIER, the clean air is vented above head height. This creates a draught. It also prevents viruses from an infected person being distributed directly with the air being discharged in the room.

MINIMUM RISK OF INFECTION

The TROX AIR PURIFIER is equipped with a highly efficient H13 HEPA filter as it can also be used, for example, for air purification in operating theatres. This filter has an ideal separation efficiency of 99.95% – even for coronaviruses and their known mutations.

PROVEN SAFETY

The TROX air purifier was tested by a leading independent specialist for qualification and validation of clean room devices and the effectiveness was officially confirmed.

LOW POWER CONSUMPTION

The TROX AIR PURIFIER can be permanently operated without any concerns. Despite its high output, the device consumes less power on average than a 100-watt bulb.

QUIET OPERATION

The TROX AIR PURIFIER is quieter than any comparable device. In normal operation (1000 m³/h air change rate), it is about as quiet as a computer fan – making it ideal for use in the classroom.

ALSO SUITABLE FOR LARGE ROOMS

Up to 1,600 m³ air can be filtered by the TROX AIR PURIFIER within an hour.

No other device of this class can do more!

This means that a single TROX AIR PURIFIER is sufficient to remove aerosols containing viruses, even from large rooms.

Find out more.

THE TROX HFS+V CALCULATOR

With the TROX HFS+V (hands, face, space + ventilation) calculator, you can easily determine whether sufficient infection protection is provided in your premises – based on the specifications of the leading associations of the air conditioning and ventilation industry.

choose TROX.

TROX VENTILATION TECHNOLOGY FOR SCHOOLS: ALL SOLUTIONS AT A GLANCE

CLEAN AND HEALTHY INDOOR AIR

WITH TROX SCHOOLAIR AT PAUL SPIEGEL VOCATIONAL COLLEGE IN WARENDORF

The decentralised ventilation units of the SCHOOLAIR V type could be easily retrofitted thanks to their small spatial requirement. For this purpose, a narrow window element was exchanged for an air duct, the existing parapet was adapted to the unit height and finally a cladding was chosen to match the room concept.

SCHOOLAIR V ventilation units ensure virus-free air through permanent air exchange. At the same time, they reduce the CO2 content and regulate the humidity. Integrated VOC sensors monitor the room air and automatically adjust the unit's performance – for optimal indoor air quality and a noticeably better learning environment.

80% LESS SICK LEAVE

WITH THE TROX AIR PURIFIER AT JULIUS STURSBURG SECONDARY SCHOOL, NEUKIRCHEN-VLUYN

TROX AIR PURIFIERS have been in operation in several classrooms here since autumn 2020. The devices were set up, connected to the power and could be used immediately.

Pupils and teachers hardly notice the air purifiers in everyday school life. And still feel better protected. Because TROX AIR PURIFIERS reliably filter coronaviruses, as well as all other viruses and bacteria.

This reduces the risk of contracting infectious diseases. This is also indicated by the sickness rate, which was a full 80% lower than in the same period last year.
