TROX Malaysia and Vietnam distributor, Konia Group have work hand in hand to organize a half day seminar on 13th December 2018 at Sheraton Saigon. This is our first event with our newly joined distributor, which we believe it could elevate the partnership and together, growing the market at the southern region of Vietnam.

We targeted an audience of around 50 but the response was overwhelming and there was total 80 participants have shown up for the seminar. The main speakers were Mr Max, Head of Sales for South East Asia of TROX Malaysia, and Vu Ho the TROX Representative in Vietnam, have introduced TROX Chilled Beams type DID-EW as the latest and innovative technology that provided variants of options and solutions. It is specially designed for hospital wards and hotel rooms. VAV boxes, X-Cubes and X-Aircontrol also have been presented as TROX Solution approach where we are now able to control everything on the air site independently from the BMS which is important to monitor warnings and alarms.

The event was ended with the lucky draw, and all the participants randomly won a prize.
